

Federico Agustín Caccia

Curriculum Vitæ, November 2019

Personal Data

Name: *Federico Agustín Caccia*

Date and place of birth: *8th February 1989, Corrientes, Argentina*

Passport: *AAE717772*

Adress: *Av. Bustillo 9500, San Carlos de Bariloche (CP:8400), Argentina*

Civil status: *Single*

Phone: *+54 9 3476 623177*

Email: *federicoagustincaccia@gmail.com*

Github: *www.github.com/fedecaccia*

Linkedin: *www.linkedin.com/in/fedecaccia*

ResearchGate: *www.researchgate.net/profile/Federico_Caccia2*

Education

- 2017 **Master Degree in Engineering**, *Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.*
Thesis: *Multiscale coupling in fluid-dynamic calculations.*
Director: PhD. Enzo A. Dari.
- 2014 **Nuclear Engineer**, *Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.*
Thesis: *Conceptual Design of a Fast Nuclear Reactor.*
Director: PhD. Eduardo Villarino.
- 2011 **Student in Civil Engineer**, *Facultad de Ciencias Exactas, Ingeniería y Agrimensura, Universidad Nacional de Rosario, Rosario, Argentina.*
Attended the first two years of the career until obtaining the scholarship of degree in Balseiro Institute.

Professional Experience

2019-present **Low Level Software Developer**, *Accelone*, Buenos Aires, Argentina.

Accelone is a software company that offers custom software development, staffing, and project delivery services.

- Project: Lattice Project.
 - Duration: June 2019 - present.
 - Description: Lattice is a trading platform to improve performance for banking networks operating with crypto currencies.
 - Responsibilities and achievements: Design and implementation of data processing algorithms to achieve time performance and transactions cost reduction, using C++ and MongoDB. Architecture design and backend implementation, using Amazon Web Services, nodejs and Microsoft SQL Server. API implementation using Express.js framework. Web3.js and other javascript libraries to implement blockchain communication. Working with SCRUM methodology.
 - Main technologies: node, python, C++, Microsoft Server SQL, MongoDB, web3.js, AWS.

2018-2019 **Blockchain Research & Developer**, *CoinFabrik*, Buenos Aires, Argentina.

CoinFabrik is a software company focused on Blockchain Technologies, FinTech and Smart Contracts Development.

- Project: Bitcoin Banco Project.
 - Duration: January 2019 - April 2019.
 - Description: Permissioned blockchain design and development using Ethereum platform and Proof of Authority (PoA) consensus. Blockchain performance evaluation, development of web wallet and block explorer customizing open source projects.
 - Responsibilities and achievements: Functional analysis during initial inception phase. Lead technical developer (team composed by 5 developers) on development phase. Architecture design. Software development using node and web3.js library. Research analysis to characterize network behavior under different parameters configuration (block time, gas limit, sealers number). Final set up and product deployment using Ansible. Working with SCRUM methodology.
 - Main technologies: node, geth library, web3.js library, python, PostgreSQL, Ansible, Digital Ocean.
- Project: Cryptoassets quantitative analysis.
 - Duration: February 2018 - November 2018.
 - Description: Correlation and cointegration analysis in cryptoassets. Trading strategies analysis, mainly focused on statistical arbitrage and mean reversion algorithms.
 - Responsibilities and achievements: data analysis and code development.
 - Main technologies: python, MongoDB, ccxt library, scipy, scikit-learn, Google Cloud.
- Project: Front-end trading exchange.
 - Duration: July 2018 - October 2018.
 - Description: Centralized cryptoassets trading exchange font-end.
 - Responsibilities and achievements: Product owner, functional analysis and UX design.
- Project: Online News Clustering.
 - Duration: February 2018 - April 2018.
 - Description: An incremental clustering of text documents code was developed using natural language processing techniques. The program is composed by a web scrawler and a main alogrithm which performs online clustering on breaking news, tweets and social media articles.
 - Responsibilities and achievements: research and code development.
 - Main technologies: python, MongoDB, numpy, pandas, scikit-learn, scipy, Google Translation API, and other NLP specific libraries.
- Others:
 - Taringa! decentralization: Decentralization of Taringa!, the latin-american social network with 500K daily active users. Platform design, including architecture, token dynamics, incentives and economics.
 - Aeternity game dApp. Development of a game decentralized application using aeternity state channels, nodejs and Sophia smart contracts.
 - Mofiler (decentralized platform for the gathering, enrichment and trading of massive data generated by millions of devices): Token economics, which includes MOFI utility token and MOFX security token valuations.
 - Blockchain scalability research: Loom network platform testing and evaluation.
 - Money On Chain decentralized exchange research: Analysis and comparison of different solutions to allow scalable and secure transactions in a decentralized exchange built on smart contracts running on RSK platform.
 - Coinfabrik blog articles: research and writing.
Articles: <https://blog.coinfabrik.com/author/federico-caccia/>

- 2018-present **Project Lead & Back-End Developer**, *Terrae Game*, Buenos Aires, Argentina.
 Terrae is a blockchain based Massive Multiplayer Online (MMO) strategy game being developed in a partnership with Skale Labs. Server and client applications are developed with Unity and the blockchain architecture uses smart contracts developed on Solidity over Ethereum mainnet. Transactions scalability is achieved using Skale sidechain technology.
 ○ Main technologies: Unity, C#, MongoDB, Nethereum, Solidity, Truffle, node.js, web3.js.
- 2018 **Engineering Consultant**, *SIC-TEC*, Mendoza, Argentina.
 CFD using OpenFOAM modelling O&G systems.
 References: Eng. Eduardo Tano (tano@sic-tec.com.ar).
- 2014–2017 **Nuclear Engineer**, *Computational Mechanics Department in National Atomic Energy Commission*, San Carlos de Bariloche, Argentina.
 Basic Engineering Projects for Nuclear Research Reactors.
 Development of thermohydraulic calculation codes.
 Director: PhD. Enzo A. Dari (darie@cab.cnea.gov.ar), Co-director: PhD. Mariano Cantero (mcantero@cab.cnea.gov.ar).
 Responsibilities and achievements:
 ○ Validation of the calculation line for the model of the Second Shutdown System of the RA-10 reactor.
 ○ Multiscale analysis of the Second Shutdown System of the RA-10 reactor.
 ○ Fluid dynamics simulations of biphasic flow with the techniques of *volume of fluid* using OpenFOAM and *level-set* using Par-GPFEP.
 ○ Development of Newton master code for explicit and implicit coupling of calculation programs.
 ○ Coupling of neutronic codes (PUMA, Fermi) and thermohydraulic codes (RELAP5, Par-GPFEP and other own development codes).
 ○ Version control implementation (Git) for computational codes and technical documentation.
 ○ Main technologies: fortran, C, C++, python, OpenMP, Open MPI, PETSc, OpenFOAM, Latex.
- 2014 **Engineering Consultant**, *SIC-TEC*, Mendoza, Argentina.
 Wind load modeling on structures under construction using OpenFOAM.
 References: Eng. Eduardo Tano (tano@sic-tec.com.ar).
 ○ Main technologies: python, OpenFOAM.
- 2013–2014 **Undergraduate Intern**, *Nuclear Engineering Department in INVAP S.E.*, San Carlos de Bariloche, Argentina.
 Nuclear engineering thesis: *Conceptual Design of a Fast Reactor*.
 Director: PhD. Eduardo Villarino (men@invap.com.ar).
 ○ Main technologies: Condor, CITVAP.

Teaching Experience

- 2016 **Auxiliar teaching ad-honorem**, *Matemática 2A (Mathematics 2A) and Métodos Numéricos (Numerical Methods)*, *Balseiro Institute, Cuyo National University and National Atomic Energy Commission*, San Carlos de Bariloche, Argentina.
 References: PhD. Javier Fernandez (jfernand@cab.cnea.gov.ar), PhD. Enzo A. Dari (darie@cab.cnea.gov.ar).

Languages

Spanish **Native language.**

English **Fluent (reading, writing). Intermediate (speaking).**

French **Basic communication skills.**

A1 international certificate, 2015.

Technical Skills

Scientific Programming Languages

C	Advanced level	C++	Advanced level
CUDA C	Intermediate level	Fortran	Intermediate level
Octave	Intermediate level	Scripting	Intermediate level

Back-end Programming

Node.js	Intermediate level	Python	Advanced level
---------	--------------------	--------	----------------

Blockchain Programming

Solidity	Intermediate level
----------	--------------------

Front-end Programming

React	Basic Level
Native	

Game Programming

Unity 3D	Intermediate level
----------	--------------------

Other

- Cloud Computing: AWS Cloud Watch, AWS EC2, AWS EBS, AWS Lambda, AWS S3, AWS SNS, AWS SQS, AWS Step Functions, AWS VPC.
- Databases: MySQL, Microsoft SQL Server, MongoDB.
- Operating systems: Debian GNU/Linux, Microsoft Windows.
- Scientific libraries: cuRAND, GNU Scientific Library (GSL), Matplotlib, NumPy, OpenMP, OpenMPI, Pandas, PETSc, PyBrain, PyFoam, PyMongo, SLEPc, ScyPy, Scikit-learn, Thrust.
- Scientific software: GNU Project Debugger (GDB), Gmsh, Gnuplot, Mathematica, MATLAB, OpenFOAM, Origin, Paraview, SALOME.
- Technical and scientific documentation: Latex, Markdown, Microsoft Office.
- Version control software systems: Git, Mercurial.

Grants and fellowships

- | | |
|-----------|---|
| 2017 | Scholarship to attend <i>Latin American Summer School in Computational Neuroscience LACONEU 2017</i> . |
| 2014–2017 | Professional perfectioning grant <i>A1P</i> from the National Atomic Energy Commission to work in Computational Mechanics Department. |
| 2011–2014 | Scholarship from the National Atomic Energy Commission to study Nuclear Engineering at the Balseiro Institute. |

Specialization courses

Courses taken during Masters:

- 2016 *Modeling of thermohydraulic systems in reactors using plant codes* – Professor: PhD. Pablo Zanocco, 80 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2015 *Introduction to computing with GPUs*, Professor: PhD. Flavio D. Colavecchia, 64 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2015 *Introduction to distributed processing*, Professor: PhD. Enzo A. Dari, 60 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2015 *Neural Networks*, Professor: PhD. Germán Mato, 128 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2014 *Finite element method*, Professor: PhD. Enzo Dari, 120 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2014 *Numerical methods in fluid mechanics*, Professor: PhD. Federico Teruel, 80 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2013 *Reactor analysis and calculation*, Professor: PhD. Edmundo Lopasso, 80 hs, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.

Other courses

- 2019 *MongoDB Performance Course*, MongoDB Online course taken at university.MongoDB.com. Authenticity of this certificate can be validated by going to: http://university.MongoDB.com/course_completion/cebf0a58-416e-42cc-8811-ad724d5bdfef
- 2019 *MongoDB Basic Course*, MongoDB Online course taken at university.MongoDB.com. Authenticity of this certificate can be validated by going to: https://university.MongoDB.com/course_completion/f8830761-6904-47e0-9ab3-69e37678ba1c
- 2018 *SQL and Relational Databases*, Online course taken at cognitiveclass.ai, an IBM initiative. Authenticity of this certificate can be validated by going to: <https://courses.cognitiveclass.ai/certificates/53cf83156de943e3810cb45563eeec12>
- 2018 *Data Analysis with Python*, Online course taken at cognitiveclass.ai, an IBM initiative. Authenticity of this certificate can be validated by going to: <https://courses.cognitiveclass.ai/certificates/1e4b7f8f9b9c4258927b7e663f3165b5>
- 2018 *Deep learning with tensorflow*, Online course taken at cognitiveclass.ai, an IBM initiative. Authenticity of this certificate can be validated by going to: <https://courses.cognitiveclass.ai/certificates/3043c010ae9745818c7917e771f79954>

Publications

Technical Reports at National Atomic Energy Commission

- 2015 *Hydrodynamic analysis of the Second Shutdown System of the RA-10 reactor*, Ludmila M. Rechiman, Mariano Cantero, Enzo A. Dari, Federico A. Caccia and Andrés Chacoma, Technical Report CNEA IN-ATN40MC-04/2015, San Carlos de Bariloche, Argentina.

Publications in international journals

- 2017 *Three-dimensional hydrodynamic modeling of the Second Shutdown System of an experimental nuclear reactor*, Ludmila M. Rechiman, Mariano Cantero, Federico A. Caccia, Andrés Chacoma and Enzo A. Dari, Nuclear Engineering and Design, vol 319, pp 163-175, doi: 10.1016/j.nucengdes.2017.04.024.

Presentations at congresses with publication in acts:

- 2016 *Multiscale coupling in fluid-dynamic calculations*, Federico A. Caccia and Enzo A. Dari, XXII Congress on Numerical Methods and its Applications ENIEF 2016, National Technological University, Córdoba, Argentina. Published in *Mecánica Computacional* Vol XXXIV, págs. 1955-1972.
- 2016 *Validation of a multiscale model of the second shutdown system of an experimental nuclear reactor*, Ludmila M. Rechiman, Mariano Cantero, Federico A. Caccia and Enzo A. Dari, XXII Congress on Numerical Methods and its Applications ENIEF 2016, National Technological University, Córdoba, Argentina. Published in *Mecánica Computacional* Vol XXXIV, págs. 2199-2215.

Publications in CoinFabrik Blog

- 2019 *On Ethereum Performance Evaluation Using PoA*
- 2018 *An Efficient Algorithm to Exploit Arbitrage Opportunities in Crypto Markets*
- 2018 *A Summary of Satis Group's Latest Cryptoasset Valuation Report*
- 2018 *Analyzing Blockchain Networks with Metcalfe's and Odlyzko's laws*
- 2018 *A Review on Cryptoasset Valuation Frameworks*
- 2018 *What I have learned from my arbitrage experiences with cryptoassets*

Conferences and courses attended:

- 2017 *Evolution of neural computation*, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2017 *Latin American Summer School in Computational Neuroscience LACONEU 2017*, Project: *Sensory adaptation without plasticity in the V1 visual cortex*, Institute of Complex Systems of Valparaíso, Valparaíso, Chile.
- 2017 *Computational Neuroscience: new trends and challenges for the 2030*, Institute of Complex Systems of Valparaíso, Valparaíso, Chile.
- 2016 *Machine Learning*, Balseiro Institute, Cuyo National University and National Atomic Energy Commission, San Carlos de Bariloche, Argentina.
- 2016 *XXII Congress on Numerical Methods and its Applications ENIEF 2016*, National Technological University, Córdoba, Argentina.

2015 *Plasma processing of radioactive wastes: process engineering, flue gas and solid wastes*, organized by the Nuclear Material Department, the National Program of Radioactive Waste Management and the International Atomic Energy Agency, Bariloche Atomic Center, San Carlos de Bariloche, Argentina.

2014 *XXI Congress on Numerical Methods and its Applications ENIEF 2014*, Bariloche Atomic Center, San Carlos de Bariloche, Argentina.

Software development

Terrae Game Terrae is a Massive Multiplayer Online decentralized war game. Gamers can build empires, conquer lands, rule over kingdoms, trade in marketplaces and make alliances with other players. All actions are recorded in a decentralized way using blockchain technologies, to show transparency and to guarantee the players real ownership of the lands, armies and other assets. (<https://terraegame.com>).

Hermes Hermes is a crypto platform to test and run trading algorithms (<https://www.github.com/fedecaccia/hermes>).

Online News Clustering Online News Clustering is a natural language processing code that performs incremental clustering over news, tweets and other social media articles (<https://www.github.com/fedecaccia/Online-News-Clustering>).

Newton Newton is a master code that solves explicit and implicit coupling in nonlinear calculations, for example, in fluid-dynamic, neutronic and termohydraulic coupling, etc. (<https://www.github.com/fedecaccia/newton>).

Par-GPFEP Par-GPFEP is a general purpose finite element program designed to solve mechanic problems involving multiphase flows, turbulent models, free-surface tracking, heat transfer, fluid-structure interaction and others.
